

# Viste dw\_\* — Sorgenti e Query (riferimento sintetico)

Per ogni vista: **cosa rappresenta**, **tabelle sorgenti** e **query SQL** usata per generarla.  
Schema di destinazione: `public`. Sorgenti: `dwh` = questionari (EAV), `ca` = Conti Annuali.  
Collegamento ente comune alle viste dei Conti Annuali: `ca.<fatto>.ISTITUZIONE = ca.lk_istituzioni.istituzione_id; ca.lk_istituzioni.CODI_FISCALE = dwh.lk_questionari_enti.codice_fiscale_ente -> id (= istituzione)`.

## Indice: vista -> tabelle sorgenti
